

# EQUIPMENT Security and Emergency Staff

In order to facilitate the work of the security forces, TecnoVe Security has created a new product line focused on equipment for security and emergency staff, which is comprised of products that have been tested on the international market by special security forces and emergency services.

When dealing with security, it is vital that everything runs as efficiently as possible. Therefore, this line offers products which are user-friendly, light and flexible and which allow for the free and easy movement of those who use them for work.

Above all, this equipment is manufactured in accordance with the highest technical and legal requirements and will not disappoint the most demanding professionals.
