

OTHER PRODUCTS Shooting Galleries

Tecnove Security builds and renovates different types and sizes of shooting galleries using top acoustic and security materials. A technical study is performed on the design and layout of the product before its manufacture thereby optimizing end results.

This product complies with all current legislation and holds the corresponding certificate of authorisation.

Configuration

- Floor manufactured with rubber sheeting.
- Walls manufactured with a configuration of anti-rebound materials.
- Ceiling made of anti-rebound materials and thermal and acoustic insulating materials, forming a false ceiling.
- Parabola made of anti-fragment blankets, parabola sheets and ballistic steel sheeting.
- Fluorescent lights with electronic ballast and intensity regulator.
- Ventilation system to remove gases derived from gunpowder deflagration.
- Acoustic insulating doors.
- Targets (mobile, electronic and for combat shoots).
- Target control system.
