

# SECURITY FORCES AND EMERGENCY SERVICES

## Transformations for the Fire Brigade

The vehicles used for primary intervention are prepared for rapid action against fire and offer solutions at different levels, including co-ordination, staff transport and the transport of materials. The vehicles are designed and equipped with certain accessories to facilitate quick communication and response thereby controlling the fire speedily.

The most popular chassis are SUVs, pick-ups and light vans. Tecnove Security works with all makes of vehicles and with all fire department materials suppliers, which results in an extremely flexible offer to transform vehicles to satisfy the specific needs of each client.
