

OTHER PRODUCTS Horse Transport Vehicles

In the transformations performed on horse transport vehicles, priority is given to the safety and comfort of occupants as well as a functional and versatile solution according to the clients' requirements.

Tecnove Security also offers personalised solutions for the transport of dogs and cats as well as vehicles which have been specially designed to cover different clients' needs to transport animals for the police, fire brigade, rescue services, kennels, animal dealers or for hunting or shooting purposes. The interior is safe and comfortable with easy access to control the animals.

Based on a chassis cabin, the body shell is developed and fully-equipped so that both the driver and the rider enjoy safe and comfortable conditions. The truck consists of space for two to six horses plus a living area for two people with the possibility of installing extras in both the horse and staff areas.
